
Circle: technical PASS; square*: conditional interval, CHER ESR1 4736/5000 valid fits. Higher marker means higher frozen score.
tail / BH-h: historical two-sided bootstrap sign-tail / within-family BH-transformed summary; confirmatory FDR control not established.
T1/T0: TRIO and CHER, trastuzumab+lapatinib / trastuzumab; BrighTNess IGG14, carboplatin+paclitaxel / paclitaxel;
BrighTNess CIN70, veliparib+carboplatin+paclitaxel / paclitaxel; DOP, durvalumab+olaparib+paclitaxel / FFPE paclitaxel control.
Common protocol chemotherapy applies. DOP includes HR-positive and triple-negative HER2-negative disease.
TRIO contrasts do not establish randomized benefit. All 23 rows and original primary labels retained; no promotion from this sensitivity.
